"The biggest high of my life was my first solo.....until the day I test flew the airplane that I built"

- Bryant Roland Thorp T-18 Wichita Falls, TX

Transition training is the key to your first flight in a newly built or purchased airplane. In nearly all cases, your insurance company will require dual time in type before you are covered. It's difficult to find a CFI with the appropriate airplane that is willing to provide transition training.

The following aircraft are available here in the Atlanta area. We can also provide training in your aircraft. Call for rates and scheduling.

Kent Gorton's RV-6

Kent Gorton's Christen Eagle II
